

September 27 2022

To Whom it May Concern,

This letter is to verify Juan Pablo Hernandez Mosti's contractor employment from May 2019 to September 2022.

In April 2019, Juan joined 3DIQ as a software developer contractor and continued to work there through February 2021. In February 2021, Juan's contract switched to our sister company, becoming a VR software engineer at Cheerio World Inc. In February 2022, Juan's responsibilities increased and his contractor role became VR Development Lead at Cheerio World Inc., which he has held since.

Juan has been one of our most valued contractors we've worked with. He's very experienced with unity development and enjoys learning new languages and tools. He's dependable, collaborative, and a pleasure to work with. Anyone building 3D/XR software would be lucky to have Juan on their team.

For any further information, please feel free to contact us.
